

EXPERTISE IS EVERYTHING FOR | Joint Replacement

We Are Leaders in Joint Replacement

Every day, our joints take more stress than nearly any other part of our body. They bend and flex, absorb impacts while walking and running, can be strained or overextended during athletic activities, and more. Joint replacement and joint revision surgeries are so important to alleviate pain and restore full range of motion and mobility for those with joint issues.

At UBMD Orthopaedics & Sports Medicine our staff has performed countless joint repair, joint replacement and joint revision surgeries, helping patients recover their mobility and reduce or eliminate pain. Procedures include:

- Anterior hip replacement
- Posterior hip replacement
- Hip revision surgery
- Hip resurfacing
- Full knee replacement
- Partial knee replacement
- Kneecap replacement
- Knee revision surgery

Life Moves

We keep you out there

Joint reconstruction or replacement can help you return to a more active lifestyle. Our doctors take a thorough, comprehensive approach to joint reconstruction and replacement for patients experiencing arthritic conditions, sports-related injuries or traumatic accident recovery.
