

**EXPERTISE IS
EVERYTHING FOR**

Pediatric Orthopaedics

We Are Leaders in Pediatric Care

Pediatric examination and diagnosis is different than treating adults. That's why we specialize in communicating with our youngest patients in a relaxed and assuring approach, helping us determine what's bothering them and to keep them cooperative.

We're here for every body, especially those still growing.

There's a reason to choose UBMD Orthopaedics & Sports Medicine for pediatric orthopaedics. The health and well-being of children is our number one priority. That's why we treat every child with the highest level of care and respect. Our pediatric practices have the most modern equipment available to assess and treat children and adolescents.

Our Expertise

Our staff has expertise in the treatment of orthopaedic problems of the shoulder, elbow, hip, knee, spine, foot and ankle. We also specialize and take great care through modern treatment of the following pediatric orthopaedic ailments:
